

Les Promenades

(Reims, France)

Lighting design for the Promenades, a historic park that needed to be upgraded in an urban context of renewal and revitalisation of the heart of the City. The aim is to create a modular and adaptable public space that can be used for a multitude of uses, making this place a new attraction in the urban life. Lighting leads the journey of the pedestrians, with dynamic effects and illumination of natural and historical patrimony. ©Fred Laurès
